

Multihog[®]

One Machine - One Driver - Endless Applications

Barrier Mower MBM 2500

- The barrier mower mows around barriers, reflection posts, guard rails and traffic signs
- Designed for use on the Multihog MH & MX ranges
- The unit is hydraulically controlled via joystick within the operator cabin
- The mower has a reach of up to 2.5 metres (8 ft)
- Automatic touch control system adapts to the contour of the terrain
- The mower maintains continuous distance control to the guard rail
- Folds up in front of the Multihog for easy transport between sites, without restricting the view of the operator
- The barrier mower is an ideal supplement for verge mowers (see photos)
- Improves operational safety for maintenance workers, as no manual finishing work is required
- Improves efficiency as roadside verges can be mown in one run, with no need for manual finishing

Due to our policy of continuous improvement, specifications may change subsequent to publication of this sheet.
